About me:

I aim to grow in the field of front-end development, where I can apply my knowledge to create innovative and interesting web applications. I want to learn and develop further, I already have experience in team work in development. I'm looking to start my professional journey by using my skills and passion to create compelling user interfaces and participating in team projects.

Education:

Belarusian State University
I am a student of the Faculty of Mechanics and Mathematics.
My specialization is Web Programming and Internet Technologies.

Additional Skills

I have completed the seven-month 'Front End Developer' course at TeachMeSkills.
I have experience working with databases and possess UI/UX design skills, enabling me to create not only functional but also appealing user interfaces.

Skills:

JavaScript
React
MySQL
HTML
CSS
GIT
Figma
C++

English:

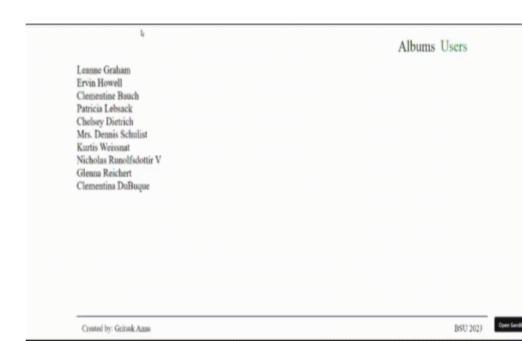

Upper-Intermediate.
Technical English.

Projects:

Album

Multi-page application utilizing external API technologies and the react-router-dom library.

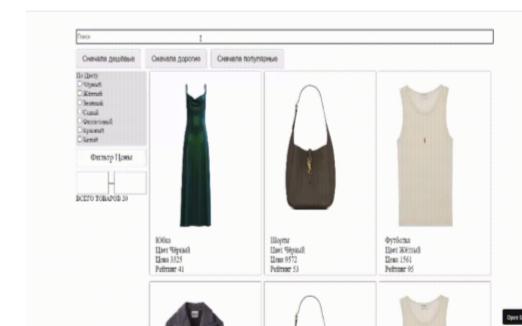

List of technologies: React, JS.

Lamoda

Implemented an online store with filters and sorting products.

List of technologies: React, JS.

Name

My first project using React, demonstrating proper state management.

List of technologies: React, JS.
